Education

B.Tech in CSE-Artificial Intelligence and Data Science

CVR College of Engineering, Hyderabad

2023–2027

CGPA: 9.28

Technical Skills

- **Languages & Concepts:** Java, Python, R, ML, Deep Learning
- **Web Technologies:** HTML5, CSS3, Bootstrap, Tailwind, Deployment (Netlify/Vercel)
- **Libraries & Tools:** NumPy, Pandas, Matplotlib, Seaborn, Sklearn, Tkinter, TensorFlow
- **Developer Tools & Methodologies:** Git, GitHub, Agile, Version Control, Unit Testing

Projects

• Job Application Tracker With Role-Based Access [GitHub]

Tech Stack: Streamlit, FastAPI, Supabase (PostgreSQL + Auth), Python, Axios, HTML/CSS

- Objective: To build a secure and role-based full-stack job application tracking platform that provides personalized dashboards for Jobseekers and Jobproviders.
- Designed and implemented user-specific workflows including adding/updating applications, search and filter, progress tracking, job posting management, and applicant monitoring.
- Implemented secure authentication and strict data isolation using Supabase Auth and Row-Level Security (RLS) to ensure protected access for each user role.

• WeatherPulse – Real-Time Weather Monitoring and Insights App [GitHub]

Tech Stack: Python, Tkinter, OpenWeatherMap API, JSON Parsing

- Objective: To build a real-time weather intelligence application with a clean desktop UI displaying live atmospheric conditions.
- Developed a Tkinter-based GUI that fetches and displays temperature, humidity, wind speed, and weather conditions using OpenWeatherMap API.
- Designed an interactive interface with on-demand weather refresh and city-based search functionality.

• IrisFloW ETL Pipeline – Data Processing System [GitHub]

Tech Stack: Python, Pandas, Supabase (PostgreSQL + API), CSV Processing

- Objective: To build an ETL pipeline for extracting, cleaning, transforming, and loading the Iris dataset into a structured database for analytics.
- Extracted the Iris dataset from local CSV files and organized it into a modular project structure for easy maintenance.
- Performed data cleaning, validation, type formatting, and preprocessing to ensure consistency and analytical usability.

Experience

• GDG on Campus – AI/ML and Data Science Team Member

CVR College of Engineering

OCT - PRESENT

- Contributing to AI/ML and Data Science projects within the GDG on Campus CVR technical community.
- Collaborating with team members to build ML models, perform data analysis, and support technical initiatives.

• Open Source Contributions

GSSoC'25

2025

- Contributed to open-source projects during **GSSoC'25**, delivering feature enhancements, bug fixes, documentation improvements, and successfully merging multiple PRs.
